BRAINSAIT DIRECTIVE

ENTERPRISE STRATEGIC DIRECTIVE · BSD-2026-07

التوجيه الاستراتيجي للمؤسسة

DIRECTIVE NO.

BSD-2026-07 · v1.0 (Final)

ISSUED BY

Dr. Mohamed El Fadil Abuagla — Founder & CEO

EFFECTIVE DATE

21 July 2026 · Review: Quarterly

ENTERPRISE OID

1.3.6.1.4.1.61026 (IANA PEN)

CLASSIFICATION

Ecosystem-Wide · Binding

CANONICAL SOURCE

brainsait/DIRECTIVE_2026-07.md

0 Authority, Scope & Supersession

0.1 Issued under the authority of the Founder & CEO, this directive is the **single source of truth** for the strategic direction of the BrainSAIT ecosystem.

0.2 It binds all personnel, contractors, partners, AI agents, autonomous systems, and software services operating under Enterprise OID `1.3.6.1.4.1.61026`.

0.3 Where any prior planning note, roadmap, or informal agreement conflicts with this directive, this directive prevails.

0.4 AI agents shall treat this document as governing context; contradicting outputs are non-compliant by definition.

0.5 Amendments require a new versioned directive issued by the Founder & CEO.

1 Vision

BrainSAIT is no longer a standalone healthcare software company. It is an **integrated, AI-native enterprise network** — interconnected platforms, marketplaces, digital products, infrastructure, education, healthcare, logistics, publishing, and autonomous agents operating as one intelligent system.

> The network shares nine substrates: Identity · Knowledge · Products · APIs · AI Agents · Enterprise Registry (129 registered nodes, 99 relationships as of 20 July 2026) · Marketplace · Authentication · Automation. Every unit builds **on** them, not around them.

2 Enterprise Architecture

Strategic domains operate under one unified architecture, connected through the **Enterprise Intelligence Layer**. No domain operates as an island.

Domain	Business Unit Mandate
brainsait.org	Enterprise flagship — healthcare AI & corporate identity
brainsait.cloud	Cloud platform, APIs, infrastructure services
brainsait.de	European presence & international operations
elfadil.com	Founder platform — publishing & thought leadership
vip.elfadil.com	Premium & private client experience
momfood.de	MOM ecosystem — community commerce & logistics

3 Enterprise Identity & Registry

The enterprise hierarchy expands under OID `1.3.6.1.4.1.61026`. The Enterprise Registry is the authoritative record of organizations, products, APIs, AI agents, standards, clinical modules, digital assets, publications, courses, and certifications.

> **An asset that is not registered does not officially exist.** Registration precedes launch. The baseline of record is the Intelligence Graph generated 20 July 2026.

4 Intelligence Marketplace

The Marketplace is the **primary distribution platform**; unlisted direct distribution is deprecated. Categories: **Software** (SaaS, AI Assistants, LINC Agents, Healthcare Platforms, Enterprise Portals) · **Digital Products** (Books, Mini Books, PDF Collections, Courses, Templates, Prompt Packs, Clinical Documents) · **APIs** (Healthcare, Authentication, AI, NPHIES, Enterprise) · **Services** (Consulting, AI Transformation, Medical Coding, Training, Enterprise Deployment).

5 Knowledge Products

All strategic documents shall be converted into premium digital products — Strategic AI Blueprints, Saudi Healthcare Transformation, Solo AI Business Blueprint, API Revision Notebook, Digital Organization Handbook, DOM Notes, Medical Coding Resources, Prompt Libraries, Research Reports, White Papers.

> **Format mandate:** PDF · Markdown · EPUB · HTML · Interactive Version · Marketplace Listing. Missing formats = not shipped.

6 Healthcare Ecosystem

Healthcare remains the clinical core: HNH, Basma, Clinical AI, FHIR, HL7, NPHIES, Revenue Cycle, Saudi SBS, Clinical Documentation, Medical Coding, Healthcare Analytics. NPHIES/FHIR conformance and PDPL-aligned data handling are non-negotiable.

7 AI Agent Ecosystem — Agent-First

Where a workflow can be executed by a governed AI agent, it shall be.

Agent	Mandate
MASTERLINC	Orchestration & enterprise command
ClinicalLinc	Clinical decision & documentation support
ClaimLinc	Claims, revenue cycle, denial management
PolicyLinc	Policy, compliance & governance
RadioLinc	Radiology & imaging workflows
TTLINC	Training, transformation & talent

8 BrainSAIT Academy

The official education platform. Curriculum: Healthcare AI, Medical Coding, Programming, Python, Swift, Cloud, Automation, Enterprise Architecture, AI Development. **Every course ships in Arabic and English.**

9 Publishing

A strategic business unit, not a side activity: Republic of Cells, Saudi Novel Initiative, Medical Books, AI Books, Technical Documentation, Storytelling, Interactive Learning — offered in multiple digital formats per Article 5.

10 MOM Ecosystem

MOM Food expands beyond catering: Community Marketplace, Talent Platform, Recipes, Home Chefs, Events, Food Logistics, Delivery, Commerce — adopting the shared substrates of Article 1.

11 Infrastructure

Standard stack: Cloudflare, Docker, Kubernetes-ready architecture, AI Gateways, MCP, Enterprise APIs, Authentication, Workers, Pages, Object Storage, Enterprise Monitoring. Deviations require documented approval.

12 Product Standardization

Every product carries: Product ID · Enterprise OID · Documentation · Version · Changelog · Marketplace Listing · API Reference (if applicable) · Licensing · AI Metadata. Missing any element = pre-release by definition.

13 Automation

Manual workflows transition progressively to autonomous execution. Priorities: content creation, customer onboarding, clinical workflows, product publishing, documentation, internal operations, marketplace management — always under human executive oversight.

14 Documentation Policy

Every project maintains: Executive Summary, Technical Docs, API Docs, Deployment Guide, Architecture Diagram, User Guide, Admin Guide, AI Agent Specification, Release Notes. **Documentation is a release gate.**

15 Immediate Priorities

- **1. Registry consolidation** — against the 20 July 2026 Intelligence Graph baseline
- **2. OID hierarchy completion** — all active units, products, agents
- **3. Marketplace expansion** — digital products, software, services
- **4. Domain unification** — six core domains, one identity & navigation experience
- **5. Knowledge productization** — strategic documents as premium offerings
- **6. Healthcare & agents** — healthcare AI platforms, LINC agents, enterprise automation

الملخص التنفيذي

يُقرّ هذا التوجيه (BSD-2026-07) التحول الرسمي لـ BrainSAIT من شركة برمجيات صحية مستقلة إلى **منظومة مؤسسية متكاملة قائمة على الذكاء الاصطناعي**، تعمل كشبكة ذكية واحدة تتشارك الهوية والمعرفة والمنتجات والوكلاء الأذكياء تحت المعرّف المؤسسي 1.3.6.1.4.1.61026. يُلزم التوجيه جميع الفرق والوكلاء والشركاء بتوحيد السجل المؤسسي، واستكمال شجرة المعرّفات، واعتماد السوق الرقمي قناةً رئيسية للتوزيع، وتوحيد النطاقات الستة في تجربة هوية واحدة، وتحويل الوثائق الاستراتيجية إلى منتجات معرفية متعددة الصيغ، ومواصلة تطوير منصات الصحة الرقمية ووكلاء LINC. أي عمل يتعارض مع هذا التوجيه يُعدّ غير متوافق ويُعاد توجيهه.
